

Product Guide

Innocoat SyT-Etch

Innocoat SyT-Etch is a powerful yet safe synthetic acid that outperforms hydrochloric acid. SyT-Etch is non corrosive and requires no neutralising, simply rinse with water. Ecofriendly, non-fuming, safe on skin, biodegradable SyT-Etch can be used in most applications.

Description

PURPOSE:

- A SAFE, POTENT concrete stripper that dissolves up to 15% MORE concrete than hydrochloric acid.
- Contains no acid & is non-corrosive = it can be applied safely to any equipment.
- It is so safe it can be left on over-night to loosen the heaviest build up.
- SyTEtch is safe on skin, 100% biodegradable, exceeds OSHA & EPA Safety requirements so is SAFE to apply, SAFE to store, SAFE on your equipment and SAFE for the environment

USES:

Ideal for cleaning pavers, bricks, swimming pools, mixers, tools, windows – anywhere you find cement, gunite, efflorescence or mortar. Cleaning that once required the use of dangerous, toxic acid can now safely be done with SyTEtch. It is entirely synthetic, so no neutralising step is required. Simply rinse with water.

Also ideal for marine cleaning, removing water line marks on hulls or general paintwork, being environmentally friendly SyTEtch can be used in so many places.

SyTEtch is non-regulated and readily bio-degradable per OECD 301D. SyTEtch is non-fuming and ERMA approved. Independent tests confirm that SyTEtch, formed with Syntech[®], the world's only synthetic acid, dissolves more calcium oxide and efflorescence than muriatic or phosphoric acids. Still, all the potency of SyTEtch comes with a triple zero HMIS score.

Product Guide

Innocoat SyT-Etch

METHOD OF USE:

Spray on, Brush on or Soak in solution.

SyTEtch can be applied directly as a concrete stripper. For heavy hard to move build ups apply SyTEtch and leave over night if needed. Simply rinse off with water

SyTEtch can also be diluted by 50% with water and used as an efflorescence remover to safely and quickly clean pavers, block, brick, concrete, rock, architectural concrete and retainer walls while dissolving all signs of efflorescence. AND SyTEtch is coloursafe on even the lightest colours. Rinse with water.

Packaging 5L, 10L, 20L, 200L

General Type Water Based Synthetic Acid

Description Slightly yellow, mild soapy clear liquid, ecofriendly, non-fuming, non corrosive, Non D.O.T Regulated, 100% Biodegradable, ERMA Approved
